

<b>Name</b>	VSO Blu-ray Converter Ultimate
<b>Version</b>	1.4.0.8
<b>Last update</b>	12/14/2012
<b>Rank at <a href="http://bluray-dvd-software.ampayer.com">bluray-dvd-software.ampayer.com</a></b>	10 of 100

<b>Detail</b>	<a href="http://bluray-dvd-software.ampayer.com/vso-blu-ray-converter-ultimate.html">http://bluray-dvd-software.ampayer.com/vso-blu-ray-converter-ultimate.html</a>
<b>Screenshot</b>	<a href="http://bluray-dvd-software.ampayer.com/vso-blu-ray-converter-ultimate-screenshot.html">http://bluray-dvd-software.ampayer.com/vso-blu-ray-converter-ultimate-screenshot.html</a>

VSO Blu-ray Converter Ultimate can convert Blu-ray videos to any format include: Convert Blu-ray videos to MKV, DVD, AVI, PS3, iPhone, iPad, Xbox and etc in just a few clicks. also it can Burn your video to DVD if you wish or import to Pc, Iphone, Ipad...Get high quality results with this complete software with all output formats needed.

VSO Blu-ray Converter Ultimate has top image quality and fast conversion, it can use advanced Image Filter to converts images down from HD to SD or select the output to be in High definition and no resize will be needed! Blu-ray Converter Ultimate also supports ISO images as input files! so, with this Blu-ray Converter Ultimate software you can convert Blu-ray videos to any format as you like.

## Key Features

### Easy to use

#### Convert Blu-ray videos to any format in an easy 1, 2, 3 step process:

- 1) Select the Blu-ray video and choose the audio and subtitle tracks
- 2) Select the output format you want: DVD, AVI, MKV, iPhone, iPad, Xbox, PS3
- 3) Press Next and sit back and relax during the conversion!

The live preview allows you to watch the conversion process. With the VSO burning engine included in the software, burn your project onto DVD automatically. Blu-ray Converter Ultimate also supports ISO images as input files!

### Perfect quality

You have a choice of various video codecs (H264, Mpeg4, Xvid) and audio codecs (AC3, AAC, DTS). Use our quality advisor to adjust the settings of your project to get the best quality: see before you even start the conversion process what the quality will be and adjust settings for fine tuning. Never be disappointed again by poor quality results!

Blu-ray Converter Ultimate also uses our advanced Image Filter to converts images down from HD to SD or select the output to be in High definition and no resize will be needed! Our image filter has already proven itself to be one of the best image resizing solutions on the market today.

### Simplified with Advanced technology

Our advanced discriminator technology does all the hard work for you behind the scenes. Whether you want to convert a movie or a Blu-ray series, the discriminator presents the main files you need and insures the correct ordering of the files. This means no more sorting through long lists of video files wondering which file is the right one to select - our software does it all for you. Not only that, but for films with multiple angles, a special preview module helps you choose which angle you want to convert.

## Extra Fast

Our software has been optimized for multi-core processors meaning you get even faster conversions. Speed up your conversions by using the Cuda profile which will use NVIDIA CUDA technology during the decoding/encoding process. Now convert 3x's faster and you can even use your computer as you normally would without being slowed down by the conversion as your GPU is processing the data instead of your CPU!

## Videos compatible with your devices

Create videos in standard or high definition format: 720 or 1080 pixels in the output size of your choice. Your video files will now be compatible with your devices. For compatibility reasons, some output formats have more features than others. For DVD format, for example, you can add a menu and chapters to the final result. Regardless of the output format selected, all converted files can be burnt to a disk with the integrated burning engine.

## System Requirements :

### Hardware

- Processor Intel Pentium III / AMD Athlon
- (Intel Pentium 4 / AMD Athlon XP or equivalent recommended)
- 512 MB RAM with Windows XP
- 1 GB RAM with Windows Vista
- Hard disk drive with at least 4.3 Gbytes free
- Blu-ray reader/optical drive

### Operating System

- Windows XP SP2, Windows Vista, Windows 7

### Extra tools

A blu-ray decrypter such as AnyDVD is needed if converting from a blu-ray disk.

### Output formats

Input format	Output format			
		Video	Audio	Subtitle
<b>Video:</b> <ul style="list-style-type: none"><li>• Blu-ray disc from optical drive</li><li>• Blu-ray Folder</li></ul>	<b>DVD</b>	- Mpeg 2 video - PAL / NTSC - 4:3 / 16:9  Creates DVD compliant structure: Audio_TS folder	- Mpeg 2 audio - Stereo - Multi-channel AC-3 or dts	DVDsub (activate in menu or with remote control)

er from hard drive

- Blu-ray ISO image file

	(always empty) Video_TS folders (with BUP, IFO, VOB files)		
<b>MKV</b>	<ul style="list-style-type: none"> <li>- Mpeg4, H264</li> <li>- Standard definition</li> <li>- HD Ready 720p</li> <li>- Full HD 1080p</li> <li>- User defined output size</li> <li>- Output can be split over multiple disks</li> </ul>	<ul style="list-style-type: none"> <li>- AC3</li> <li>- Depends on the source and the profile selected for the conversion, for a low resolution output is stereo for other profiles it can be up to 6 channels</li> <li>- Output can contain multiple audio tracks</li> </ul>	Output can contain multiple subtitle tracks in dvdsub format
