Wondershare Video to iPhone for Mac converts regular video formats to iPhone, iPhone 3G and the latest iPod touch 3.1. It also allows you to extract audio files from video for playback on iPhone easily.

Key Features

Compatible with all formats

- You can convert all popular video formats, such as AVI, MPEG, WMV, FLV and VOB, to iPhone MP4 video.
- You can extract MP3, M4A, AAC and WAV audio files from all video formats as above to iPhone.
- It fully supports iPhone, iPhone 3G, iPhone 3GS and the latest OS 3.1.

Video Editing functions

- Merge several video clips into a single one to make a creative movie.
- Trim your favorite video clips by setting Start Time and End Time.
- Crop the black edge and get rid of commercial marks.
- Adjust video brightness, contrast and saturation to get the best effect you want.

Easy to use

- A built-in player lets you preview video before conversion.
- A progress bar tells you the elapsed time and remaining time of the conversion progress.
- Concise user interface will guide you to convert video to iPhone with only a few clicks.

System Requirements

- Operating System MAC OS X 10.4 or above operating system(include Mac OS X Tiger, Mac OS X v10.5.7 Leopard and Mac OS X v10.6 Snow Leopard; Supported Mac Pro, Mac Mini, MacBook, MacBook Pro, MacBook Air, iMac).
- CPU 1G Hz or above Intel processor or Power PC.
- Ram 512M or above RAM.
