Key Features

Mac DVD ripper for various multimedia players

Quickly rip DVD to movies and music taken on iPod, iPhone, Apple TV, PSP, PS3, etc.

- **DVD video ripper**

The high support for almost all video formats enables you to easily rip DVD to AVI, MPEG, WMV, DivX, MP4, H.264/AVC, RM, MOV, 3GP video, then enjoy it whenever you want.

- **DVD audio ripper**

Rip DVD to MP3, WAV, WMA, M4A, AAC, AC3, OGG, RA, AU and such audio formats on Mac, and relax you in listening to DVD movie music on the go.

- **DVD picture ripper**

Batch extract pictures in BMP, PNG, JPG or GIF format from DVD movies by defined interval.

- **Rip DVD movies for multimedia devices**

There's always a right solution for you to rip DVD movies regardless of what multimedia

devices you own: iPod, iPhone, Apple TV, PS3, PSP, 3GP phone or other MP4/MP3 players.

Clip, merge and split to get custom file

Clip any segment, merge several files into one, and split one into several

- **Clip**

Scissor out any segments you love from DVD movie and output them respectively. Or merge all clipped segments to get a creative video.

- **Merge**

Get several source files merged with this Mac DVD ripper, and enjoy a long movie without any interruption.

- **Split**

Split a large source file into several smaller ones to satisfy your specific need and optimize your enjoyment.

Personalize your video by adjusting video effect

Bring you various featured video editing methods to colorize your video

- **Crop frame size**

Snip off the redundant edges to reserve the highlight only with drag and drop.

- **Edit effect**

Change the saturation, brightness and contrast of DVD movie, and even add artistic effect like "Old film" and "Gray" , to make the movie fit you more.

- **Adjust subtitle**

The original subtitle is not so suitable for watching? Just adjust its position, transparence and color to improve the watching effect.

- **Add watermark**

Add picture or text watermark with adjusted position, transparence and font style to label your movies.

- **Effect preview**

After editing, preview the initial movie and the fixed one to check whether the effect is just what you want.

Customize DVD rip with flexible settings

Give you the freedom and flexibility to make divers DVD ripping productions

- **Optimized and classified profiles**

This Mac DVD rip software has optimized all the profiles with different resolutions, and categorized them by various multimedia devices to make you find suitable format faster.

- **Output several profiles from one**

With this Mac DVD ripper to set diverse profiles for one original file at one time, outputting diverse files with different formats and settings can be accomplished in a single click.

- **Customize output file size**

Stop adjusting bit rate again and again to get a file with desired size, now you have a smart Bitrate Calculator tool to simplify the file size customization job greatly. Just enter the file size you want, and the corresponding bit will be calculated in a wink.

- **DVD output settings**

Set start time and duration to get a segment, select target audio track, subtitle and angle for DVD rip, and adjust more settings to make the ripped DVD movies suit you more.

High speed, ease of use and top quality

Provide you with any possibilities to simplify and facilitate your DVD ripping

- **High DVD rip speed**

The Mac DVD ripping conversion can be finished in 200% super high speed, and the speed increases with the improvement of your Mac.

- **Easy to use**

The interface is so terse and intuitive that only a few clicks are enough to rip DVD to videos and audios in any format with this DVD ripper for Mac.

- **Top quality**

Top image and sound quality distinguishes Xilisoft DVD Ripper for Mac from other Mac DVD ripping software.

- **Extra features**

Preview and take snapshot when preview; edit ID3v1 and ID3v2 tag for output MP3 or WMA audio formats; offer you multiple languages to choose in the DVD ripper for Mac.
