Key Features

Different Formats Supported

Quickly convert MKV files to various videos for playback on various digital devices

- **MKV to Different Audio or Video**

Supported video formats: AVI, WMV, DivX, MP4, H.264/AVC, XviD, MOV. Supported audio formats: MP3, WAV, WMA, AAC or M4A.

- **Compatibility with Various Multimedia Devices**

A lot of digital devices are supported with converted MKV files, devices such as iPod, iPhone, Apple TV, PSP, PS3, Xbox, Zune or other MP4 players.

- **Create Photo-Video**

Load several of your favorite photos and turn them into videos, so sharing them with friends and family will be easier.

- **Fast-Speed Conversion**

Supporting dual-core or multi-core CPU, conversion is faster so your tasks would be done within moments.

Plenty of Settings

Get multiple files from one, split, compress and trim video, and more settings

- **Convert One to Multiple Files**

Load one single file and set different output formats for it, then convert them simultaneously!

- **Split and Compress File**

If a file is too large, you could split them by setting the split time or split size; the Xilisoft MKV Converter would automatically split it for you once the set preference is reached.

- **Convert Certain Segment**

If you just like a certain scene from a movie or video, you can convert just that clip by setting the start time and duration.

- **Adjustable Settings**

Change settings such as video codec, video size, bit rate, frame rate, audio codec, channels, and more.

Quick and Simple Conversion

Provide batch process, multithreading and more features to accelerate the conversion

- **Batch Process and Multithreading**

Xilisoft MKV Converter uses multithreading technology, meaning it can convert MKV files faster and smoothly. Convert several files at the same time by batch conversion.

- **Run in Background**

Run the converter in the background while you do other tasks; it will not conflict with other programs or slow your computer down.

- **Set after Conversion Done Action**

Avoid waiting for the conversion to be done, set an action: hibernate, shutdown, standby or exit as auto-performed.
