Key Features

File size customization
Convert DVD or video to Zune video file with the size that you customize in the Bitrate Calculator. And the video bit rate can be instantly calculated.

Add several profiles to one for output
You can add multiple Zune profiles to one source video or movie file at the same time and convert them to get many Zune video files one time.

General and advanced parameter settings

Convert DVD or video to Zune videos with various video and audio parameters you customize: bit rate, frame rate, sample rate, channel, zoom mode and so on.

File split

Split a video/movie file into several Zune video files by customizing file size or the length, or just choosing the offered size.

Convert video segment

Select DVD or video segment for converting it to Zune MP4, MPEG-4 or WMV video by directly entering start time and duration.

Retrieve DVD disc info

When you insert a disc, the Zune converter software will automatically retrieve DVD info from Internet including DVD cover, film name, director, actors/actresses and release date.

Selectable DVD subtitle and audio track

If you rip and convert a DVD movie, the DVD to Zune converter lets you select DVD subtitle, audio track and angle.

Run in background and auto-detect updates

Support finishing the ripping and converting process in the background and checking for updates regularly to keep the Zune software in the latest state.

After done action

With applying one of after done actions: shut down, exit, standby and hibernate, you have no need to wait the process of converting DVD or video to Zune video.

Preview movie and snapshot

Allow you to preview DVD movie or video in the preview window and take a snapshot of loved movie scenes to save them as BMP files.

Multithreading and batch conversion

Support multithreading and batch file conversion to convert DVD or video to Zune files at one time for saving time.
